Hazardous Weather

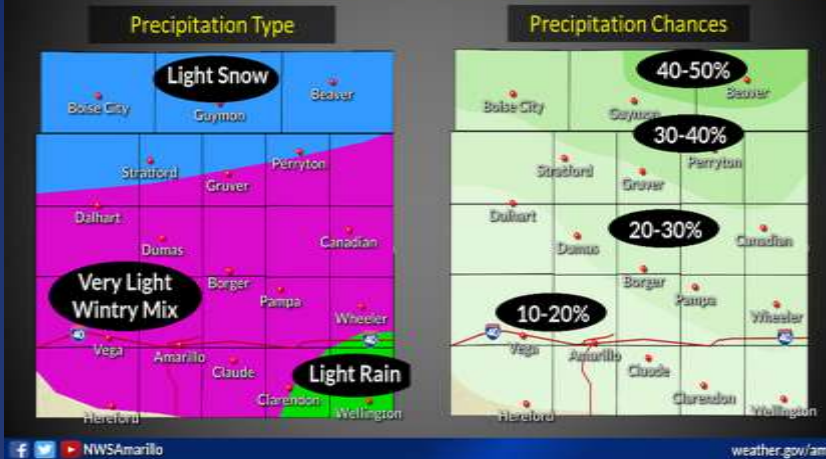

Hazardous Weather

Winter Weather Potential: Monday Night

Any accumulations of ice or snow are expected to be light

Weather Forecast Office
Amarillo, TX
Issued April 18, 2021 6:13 AM

A strong cold front will be windy and much colder conditions to the Panhandles on Monday night along with a chance for wintry precipitation. Patchy to areas of light rain and/or drizzle are expected to turn to light snow across the north and a light wintry mix with very light freezing rain and snow possible further south. If precipitation occurs, it is expected to remain light with very limited accumulations of snow or ice expected (if any at all). The best chance for light accumulations of wintry precipitation will be in the northern Panhandles where a dusting of snow is possible.

Hazardous Beach and Marine Conditions

Beach Roads May Flood | Water May Reach the Dunes

Weather Forecast Office
Corpus Christi, TX
Issued Apr 18, 2021 12:26 AM CDT

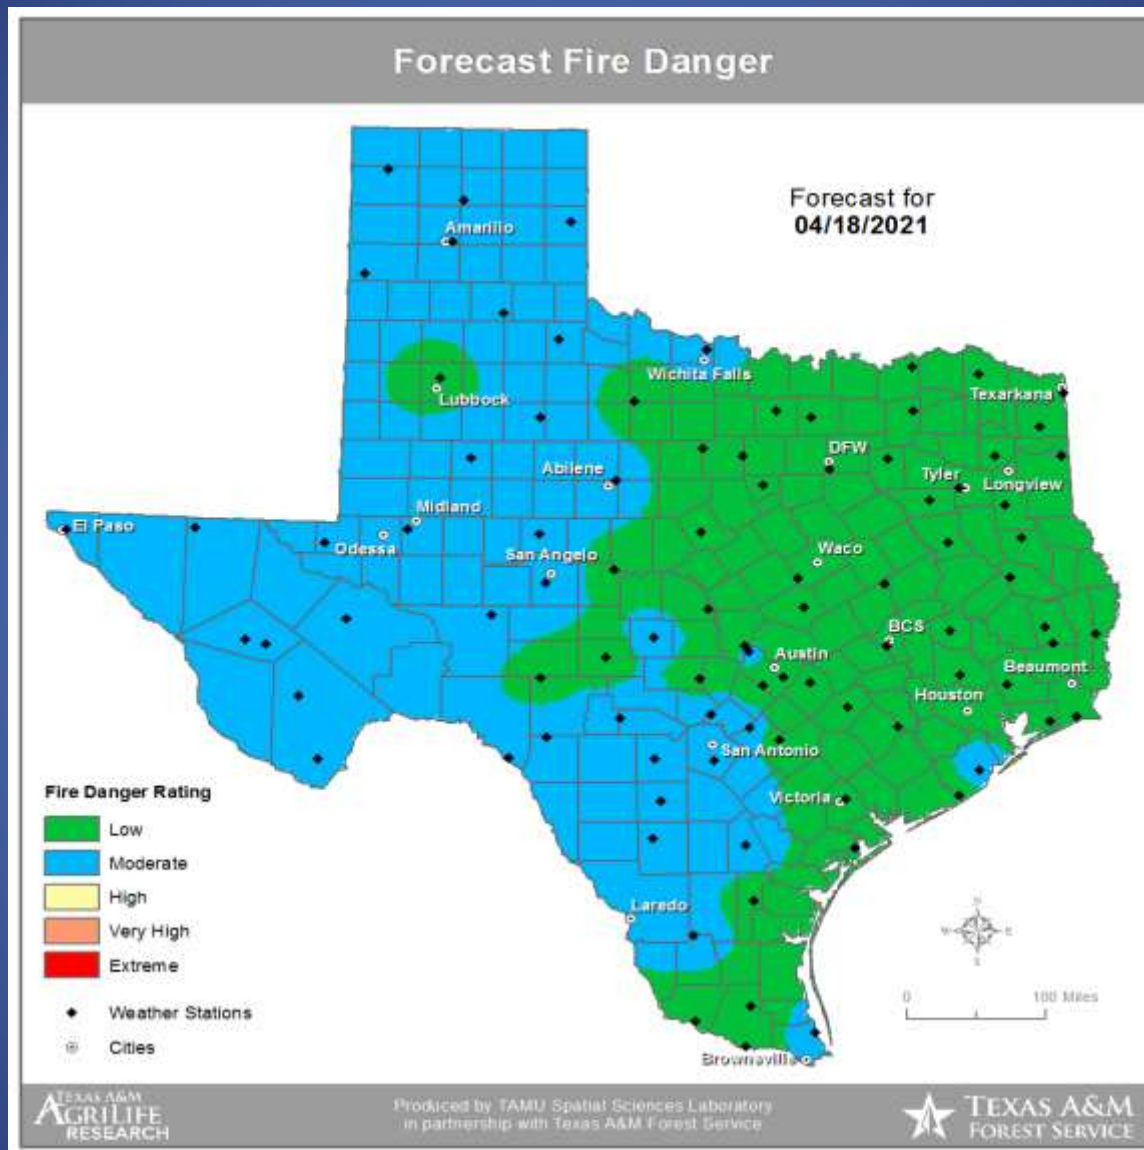

A Coastal Flood Advisory is in effect Sunday from 10 AM until 3 PM. Elevated tides will cause around 1 foot of inundation during times of high tide. This may cause beach roads to flood and water may also reach the dunes. A Small Craft Advisory is also in effect until 1 PM Sunday for strong NE winds and elevated seas.
